Control Stick

# CONTROLLER

# CONTROLLER

The Nintendo 64 Controller contains a Control Stick which uses an analog system to read the angles and direction of its movement. This allows subtle control that is not possible using the conventional + Control Pad.

When turning the Control Deck power ON, do not move the Control Stick from it's neutral position on the controller.

If the Control Stick is held at an angled position (as shown in the picture on the left) when the power is turned ON, this position will be set as neutral.

This will cause games using the Control Stick to operate incorrectly.

To reset the neutral position once the game has started let go of the Control Stick so it can return to its center position (as shown in the picture on the left) then press start while holding the L and R Buttons.

The Control Stick is a precision instrument, make sure not to spill liquids or place any foreign objects into it.

# MAIN MENU

When you start Mike Piazza's StrikeZone, the main menu will follow the title screen. From the main menu, you can choose the type of game you wish to play.

## SINGLE GAME

Play a single game with any two Major League Baseball teams.

## SEASON PLAY

Begin a new season or continue an existing one. An entire season can be played, including the playoffs and the World Series™. Use the real MLB teams or start from scratch with a full draft. Trade players with your friends or with CPU General Managers. You can even create your own league, change your League name, and choose the length of your season (162, 81, or 15 games).

In season play, you can play with the 1997 League structure or go to the 1998 structure to include the new expansion teams. Human players can control any number of teams. If you select to play a new season, you will be asked which teams will be controlled by the CPU and which by human players.

# MAIN MENU

Single Game

Season

World Series

All-Star Game

Home Run Derby™

## WORLD SERIES™

Play a seven game  
World Series™ with  
one or two players.

## ALL-STAR GAME™

Replay the 1997 All-Star Game™  
in Cleveland, or choose any other  
MLB Stadium.

## HOME RUN DERBY™

The Home Run Derby™ is a slugging match between  
the best hitters from the American and National Leagues.  
One or two can play in this home run hitting contest.

# TEAM CONTROL

## LINE-UP

Replacing players in the current roster with players from the bench changes the team's line-up. A player can change and save custom line-ups, batting orders, and pitching rotations. Substitutions can also be made during the game.

## TRADE

Trades are available only during season play. You can trade with both CPU and human controlled players, but CPU controlled teams will only accept fair trades.

## SCHEDULE

Select Schedule to view your team's entire season schedule. You can also view each team's schedule in both the American and National Leagues.

# TEAM CONTROL

## NEWS

Under the News Icon, you can view the League standings as well as team and individual League leaders in all statistical categories.

## EDIT PLAYER

Each individual player can be edited in a number of different ways. Change a player's name, number, build, hair color, skin color, ratings, batting and throwing hand, and his face.

## EDIT TEAM

A team can also be edited. Change a team's nickname, city, logo, uniform colors, stadium name, or the stadium they play in.

## DRAFT

At the beginning of each new season, you can choose to put all of your players into a pool and re-draft for all teams. CPU controlled teams will select their players automatically.

# GAME OPTIONS

# GAME OPTIONS

## DIFFICULTY

Select level of difficulty. You can choose from All-star, Veteran, or Rookie.

## GAME TIME

Choose to play your game during the Day, Afternoon, or Evening.

## GAME MODE

Choose between Arcade and Sim. Sim gives you a game experience that closely simulates an actual major league game, while Arcade indulges you in a baseball slugfest.

## STADIUM

Use this option to elect to play in a different stadium.

## QUIT GAME

Quits the current game and returns you to the Main Menu.

# CONTROLLER PAK AND RUMBLE PAK

## SAVING TO CONTROLLER PAKS

Mike Piazza's StrikeZone is compatible with the Controller Pak accessory. Before using the accessory, please read the Controller Pak accessory instruction booklet carefully. Follow the on-screen instructions to determine when you should insert or remove the Controller Pak accessory. Only one full season can be saved to a Controller Pak and it will automatically be saved. When playing in a "World Series" or Single game, the game will not be able to be saved and the system must be left on if you wish to continue later.

## RUMBLE PAKS

Mike Piazza's StrikeZone is compatible with the Rumble Pak accessory. Before using the accessory, please read the Rumble Pak accessory instruction booklet carefully. Follow the on-screen instructions to determine when you should insert or remove the Rumble Pak accessory. You cannot swap between a Controller Pak and a Rumble Pak while playing the game, so if you want to play with a Rumble Pak in your controller and also save your games, you will need to plug the Controller Pak into a spare controller.

# PLAYING THE GAME

As in the real game of Baseball, Mike Piazza's StrikeZone requires strategy as well as quick reflexes. The following are some strategic pointers that can help you optimize your game.

## BATTING

Knowing the sluggers on your team lets you capitalize on their strengths and compensate for their weaknesses. While a power hitter can hit the ball far, if his batting skill is low, he's more likely to whiff than to hit it out of the park.

## PITCHING

While some think of Pitching as just throwing a ball, a good pitcher knows that ending the inning with as few pitches as possible is to his advantage. Stamina is a huge factor in pitching; the harder you throw, the less chance the batter has to hit the ball, but the pitcher's stamina is sapped much more quickly. Changing up pitches will keep batters on their toes, as they are always looking for that pitch left carelessly over the plate.

## FIELDING

Defense is key to winning baseball. You will want to familiarize yourself not only with your fielders, but also the opposing batters to better position your fielders. If you expect your opponent to hit one out of the park, move your fielders to the back wall, but if you think they'll hit it short, bring them in closer.

# PLAYING THE GAME

## BASE-RUNNING

A player's Speed will determine how fast they can run and steal bases. Knowing the maximum distance each runner can lead-off the base will help in stealing bases and pick-offs.

## THROWING

Once the fielder has the ball, he can throw it to any base or the pitcher. It is usually a good idea to nab the lead runner, but if that is not possible, try to get another. See the Control Overview for details on throwing.

## STRATEGY

The use of strategy in Baseball is just as important as quick reflexes. The positioning of the infield and the outfield can be critical when trying to stop a single hit or to force-play at home. Knowing not only your own team, but the opposing team's strengths and weaknesses as well is essential to selecting your batting order and your bullpen. Substituting players at key points of the game will keep your pitchers fresh and put your power hitters in the line-up when you need to score a run.

# TECHNICAL SUPPORT (U.S. & CANADA)
